Experience

Pummyz Foods

May 2024 – July 2024

Full-Stack Developer

Freelance

- Designed and implemented a website from the ground up, achieving a 40 % improvement in PageSpeed Insights scores through optimized architecture and modern web technologies.
- Streamlined the UI/UX by incorporating intuitive navigation and responsive design principles, resulting in a 25 % increase in user engagement and reduced bounce rates.
- Implemented performance best practices, including image optimization, server-side rendering, and asynchronous resource loading, enhancing load times and user experience.

Take It Smart

July 2023 – Sept 2023

Frontend Developer Internship

Full-time

- Implemented lazy loading and browser caching strategies, resulting in a 30 % improvement in landing page performance.
- Devised and integrated a search feature using advanced indexing algorithms to enhance website usability.

Projects

Jamin [Deployment] [Source]

- Constructed an LLM aggregator using Node.js and Express for the backend, and React (with Vite) for the frontend.
- Integrated multiple Large Language Models (LLMs) including OpenAI and LLaMA using Hugging Face's API.
- Enabled users to upload their own text files, facilitating the application to process and query the content with the integrated LLMs.

Zort [Deployment] [Source]

- Crafted a real-time collaborative whiteboard using Next.js and WebSockets for instantaneous updates.
- Utilized Redis for session management and persistent whiteboard state storage.
- Implemented user authentication and authorization to ensure secure access and personalized sessions.

Docit [Deployment] [Source]

- Developed a real-time collaborative document editing application, akin to Google Docs, using React for the frontend and Go for the backend.
- Executed operational transform for real-time collaboration, ensuring seamless synchronization of document edits across multiple users.
- Incorporated features such as user authentication, authorization, document versioning, and history tracking to enhance user experience and document management.

Technical Skills

Languages: Python, C++, JavaScript, TypeScript, Go

Developer Tools: Git, Amazon Web Services (AWS), Supabase, Figma

Technologies/Frameworks: React, Next.js, Node.js, Redux, Recoil, Docker, Kubernetes

Databases: PostgreSQL, MongoDB, Redis, Elasticsearch

Education

Nitte Meenakshi Institute of Technology, Bengaluru

2020 – 2024

Bachelor of Engineering in Electrical & Electronics Engineering

CGPA: 7.0

Extracurricular

Q-Bits

Nov 2021 – June 2024

Club President

Part-time

- Authored two research papers on Quantum Computing using Qiskit for IEEE conferences.
- Led the creation of a WebSocket-based Quantum Key Distribution (QKD) project on Raspberry Pi platform, improving data transmission security by 30 %.

Achievements

- Ranked in the top 5 % of participants in the NPTEL Course “The Joy of Computing.”
- Achieved the Best Innovation Award for the Major Project, outperforming 75 other participants within 24 groups.
- Acknowledged as an All-Rounder in 2023 and listed on the HoD's Honor Roll, awarded to 3 out of 200 individuals.
- As Marketing Head for NASA Space Apps Challenge 2023, secured partnerships increasing resources by 30 % and led marketing efforts boosting participation and engagement significantly.
