Experience

Instahyre

Dec 2024 – Present

SDE-1

Full-Time

- Designed **Redis-based distributed locking** using atomic **SETNX + TTL** to prevent race conditions, **eliminating double-booking incidents** under concurrent traffic.
- Reduced query latency and **eliminated full table scans** by designing **composite PostgreSQL indexes**, enabling **100% index utilization**.
- Improved employer-facing REST API latency by **80% (p75: 600ms → 120ms)** by profiling slow **PostgreSQL** queries and optimizing **response payload construction** for high-traffic endpoints.
- Built **stack-based boolean query parser** (AND/OR/NOT) enabling advanced skill matching directly within **Elasticsearch** queries, improving matching relevance by **20%**.
- Reduced **regression bugs by 30%** and streamlined deployments by **modularizing three major applications** from a monolithic codebase into independently maintainable components.

Pummyz Foods

May 2024 – Aug 2024

Full-Stack Developer

Full-Time Contractor

- Enabled reliable **asynchronous order processing** for **thousands of daily events** by designing an **event-driven pipeline** using **Kafka** for order creation, status updates, and downstream service notifications.
- Implemented **payment confirmation via webhooks**, designing **idempotent order state updates** to safely handle retry events, reducing **duplicate order processing by 95%**.
- Reduced **media load times by 30%** by integrating **AWS S3 with CDN caching**, enabling efficient delivery of high-resolution assets.
- Improved **Core Web Vitals by 35%** by implementing a **Next.js SSR** architecture optimized for faster **first-contentful paint** and reduced JS bundle size.

Projects

Jamin - Fast, Helpful AI Chat

- Developed **full-stack AI platform** integrating **multiple LLMs (GPT, Claude, Cohere)** using **LangChain** and **React/Node.js**.
- Implemented **RAG** for PDF Q&A and YouTube summarization, plus **Stable Diffusion** for **image generation**.
- Designed **scalable database** with **PostgreSQL/Drizzle**, enabling **context-aware conversations** across multiple models.

Zort - Collaborative Whiteboarding Tool

- Architected a **real-time collaborative whiteboard** using **Next.js** and **Socket.IO**, supporting **100+** concurrent users.
- Implemented client-side state management using **Zustand** and **localStorage**, reducing server load.
- Engineered **CI/CD pipeline** using **Docker** and **GitHub Actions**, automating build and deployment processes with zero failures.

Education

Nitte Meenakshi Institute of Technology, Bengaluru

2020 – 2024

Bachelor of Engineering in Electrical & Electronics Engineering

Technical Skills

Languages: Python, C++, Go, JavaScript, TypeScript

Developer Tools: Git, GCP, AWS, Docker, Kubernetes

Technologies: React, Next.js, Node.js, Bun.js, Elasticsearch, Django, RabbitMQ, Kafka

Databases: PostgreSQL, Redis, Cassandra, MySQL, SQL

Achievements

- Authored **two research papers** on **Quantum Computing** using Qiskit for **IEEE conferences**.
- Won Best Innovation Award** for Major Project 2024, **ranking first among 75 students across 24 teams**.
- Named among **Top 3 All-Rounders** out of 200 students on HoD's Honor Roll (2023).
- Ranked in **top 5%** in NPTEL's 'Joy of Computing' course (2023).
- Winner** in Machine Learning Track at Mini Hackathon NMIT'22.
- Marketing Head** for **NASA Space Apps Challenge 2023**; secured **5 partnerships** to expand event resources.
